# What Is Your Full Retirement Age?

## Age To Receive Full Social Security Benefits

(Called "full retirement age" or "normal retirement age.")

Year of Birth *	Full Retirement Age
1937 or earlier	65
1938	65 and 2 months
1939	65 and 4 months
1940	65 and 6 months
1941	65 and 8 months
1942	65 and 10 months
1943--1954	66
1955	66 and 2 months
1956	66 and 4 months
1957	66 and 6 months
1958	66 and 8 months
1959	66 and 10 months
1960 and later	67

*\*If you were born on January 1st of any year you should refer to the previous year. (If you were born on the 1st of the month, we figure your benefit (and your full retirement age) as if your birthday was in the previous month.)*

**Note:** If you delay your retirement benefits until after full retirement age, you also may be eligible for delayed retirement credits that would increase your monthly benefit. If you decide to delay your retirement, be sure to **sign up for Medicare at age 65**.

In some circumstances, medical insurance costs more if you delay applying for it.
