Business Manager’s Report

The Power of One! Hope Will Rise From Chaos and Despair

Brothers and Sisters,

We have seen their rallies and demonstrations from the state house in Florida to the Capitol in Washington, DC. They are heard on news shows and quoted in newspapers and magazines. They dominate social media.

Their message is not only being heard around the country, it is resonating around the world. And, their voices are being heard. No matter how you feel about the Second Amendment, no one needs weapons of war for hunting or self-protection. Now after nearly 20 years of mass shootings from Columbine to Sandy Hook to Las Vegas to Parkland, the calls for strengthening our gun laws are finally being heard.

Because the kids from Parkland stood up the Florida Legislature voted to enact a waiting period to purchase a gun, and prohibited the sale of long rifles to anyone under the age of 21. Less than a week later the bill was signed into law.

Their actions have also initiated similar movements throughout the country. Movements that have led to the introduction of tougher gun laws in nearly a dozen other states.

Standing Up For Unions

Last month the Supreme Court of the United States heard arguments in Janus v. American Federation of State, County and Municipal Employees (AFSCME). The case centers on the longstanding precedent allowing public sector unions to collect “agency fees” from union-covered employees who do not wish to join the union.

Janus argues that those fees violate his First Amendment rights to free speech, because the union takes positions he does not support.

While this case is currently limited to public sector unions, should the Court side with Mr. Janus, it would, much like Right to Work laws have serious ramifications for all unions.

That is why, on the Saturday before the Court heard those arguments union members from across the metropolitan area held a solidarity rally in Foley Square. I want to express my thanks and gratitude to our brothers and sisters within Local 94 who turned out and made sure our voices were heard.

Hopefully they resonated in Washington. However, with the conservative majority sitting on the Supreme Court there is sense Janus will prevail by a 5-4 vote. To be honest there was not much optimism within the union movement in the days following the hearing. Then something stirred in the hills of West Virginia. The state’s 20,000 school teachers — who earn an average of $45,000 a year — and had not had a raise in four years went on strike. After years of cuts to West Virginia’s education budget and an increase in the teacher’s contribution to the medical plan, the teachers had enough. So, like the students in Parkland, West Virginia’s teachers said: “No more!”

Immediately after the walkout Governor Jim Justice offered the teachers a 1-percent raise for the next five years. According to the New York Times when the teachers factored in inflation, the raise amounted to a 5 percent cut.

Despite not having a union like teachers in Chicago and elsewhere, teachers in West Virginia reached a deal to end a statewide strike and winning 5 percent raises.

The teachers turned it down. After a series of negotiations Justice returned with an offer of 5 percent increase per year. In West Virginia, Justice did not have the final word. Because West Virginia is a right-to-work state the teachers do not have a collective bargaining rights so the deal needed legislative approval.

The West Virginia legislature, which never saw a tax cut they didn’t love, or a wage increase for state workers they couldn’t abide, decided to cut the proposed raise to 4%.

The teachers refused to go back to work. The teachers walked picket lines, yelled and spread their story throughout the state and across the county. They would not go back to work without that 5 percent raise. Finally, after nine days, Justice and the legislature agreed to the 5 percent increase. The teachers apparently taught the governor a valuable lesson. “We have to move away from treating education as some necessary evil,” said Justice. “Education is a process and an investment in our future.”

For the teachers, Katie Eindt, a high school English teacher told the Times: “We come from an area that is known for standing up for what they believe in. We’re just reviving the movement that was started years ago.”

It is a movement we in Local 94 and union men and women everywhere should be committed to keep alive!

In Solidarity,

Kuba J. Brown
Business Manager and Financial Secretary

Like the students in Parkland, West Virginia’s teachers said: “No more!”
No Hesitation in Manhattan Chief’s Response to Florida Hurricane S-O-S

As the longtime Chief at one of lower Manhattan’s American Express Tower on Vesey Street, Joe Longa, knew he was among the lucky ones when Superstorm Sandy roared through in 2012. “We had some water in the basement, but it was certainly nothing crazy,” Longa recalled. “We were lucky.”

Longa knew the damage and dangers so many Local 94 chiefs and engineers had to contend with to bring their buildings back to life. So, when Hurricane Irma roared through Florida, seriously damaging the newly opened Florida Headquarters of American Express, Longa volunteered to fly down to help.

Located in Sunrise Florida, the 400,000 square-foot glass and steel structure stretches nearly 600-feet long, had opened to great fanfare in January. The state-of-the-art building housed 3,000 employees and along with work stations featuring game rooms, a putting green, a fitness center, a wellness center, along with a daycare center and a playground.

Amenities and mechanicals meant nothing to the hurricanes and the Sunrise building was being battered.

“The storm was still in play when I was asked if I would go down and help deal with the damage. I was told we were going to fly down as soon as the storm cleared,” Longa recalled. Within hours Longa and three senior leaders of the facilities team were aboard the company jet. Arriving some- where around 10:30 that night, the team went directly to the building to assess the damage. “It was a category five hurricane. The chillers were down, the UPS room was destroyed by the water, the alarms were ringing and there was water everywhere,” Longa recalled. “As if the storm wasn’t bad enough, the sprinklers had gone off and were running for 20 hours.”

By 2:30 a.m. the next morning the team had disabled the alarms, and developed a game plan. “We were back at 7 am.”

The UPS was destroyed by the water, the alarms were ringing and there was water everywhere,” Longa recalled. “As if the storm wasn’t bad enough, the sprinklers had gone off and were running for 20 hours.”

As it turned out, the assigned chief for the building was on vacation, and so it was Longa who took charge when the regular crew arrived. “We knew what had to be done. We concentrated on the board in the UPS room. Between the electricians, the crew and the people from the recovery team, we started getting things together within a couple of days.” Getting things together meant getting the two chillers running, getting the water out of the conduits in the UPS, replacing all the sheetrock, and restoring the damage in the child care area. “We were basically working the entire week, Monday through Saturday,” said Longa. He had no complaints.

“I knew we had people here, the property owners gave their blessing, so I was comfortable with going down. We were good. The people in Florida were dealing with their own situations at home. “We’ve done it before. We’ve sent down a bunch of guys to help take care of it.”

With the multi-million dollar retrofit at 605 Third Avenue reaching its final stages, Jack Whalen III, General Manager for Fisher Brothers, can’t say enough good things about the Local 94 engineers who are helping bring the project to fruition.

The building which first opened its doors more than 50 years ago has seen its share of improvements over the years. VFD installations, refrigerant conversions, and BMS upgrades to name a few. At this point in time however, Whalen was faced with a decision regarding the two 1,300 ton steam powered Worthington chillers that provide cooling to the 1 million square foot building. Long term operation and maintenance was a great concern due to the lack of readily available Worthington compressor parts.

Working with the building’s Local 94 chief and engineers as well as outside consultants Whalen and his team developed a plan to upgrade the systems and improve efficiencies. “You just have to look at the history of Local 94 going back to the 1960’s. They ran things manually and mastered the technology as it became available. There are no better operators and technicians in the industry,” said Whalen. “We are big believers in putting trust in the guys who know our buildings and how to best operate them.”

That belief was rewarded in a nearly two-year, hands-on project coordinated by Chief Engineer Brendan Murphy, Assistant Chief Mike McCormick, and engineers Rich Fonseca, Sean Dunne, Efrem Alter, Raymond Spezzacatena, Chris Bondy, and Assistant Engineer John Donnelly, Jr.

According to Whalen among the most important decisions was whether to replace or retrofit the chillers. When one of the engineers noted they would never find machines that were as well made and robust as their Worthingtons, Fisher Brothers opted for the retrofit. “We challenge our guys to look out for what’s out there and come to us so that we can go to ownership with what makes sense,” said Whalen.

Whalen. Working in two phases, 605 Third Ave., now boasts two high efficiency low operating cost chillers – one electric and one steam. “What is happening here is what happens at our 299 Park Avenue, Park Avenue Plaza, and 1345 Avenue of the Americas buildings. It starts with the leadership of our chiefs and assistant chiefs and works all the way down the chain to the helpers,” said Whalen.

Various improvements around the Fisher Brothers portfolio have included a new ice plant, state of the art chiller control panels, energy control valves, BMS system enhancements, the installation of VFDs and efficiency motors, and high efficiency steam insulation. “What is most impressive is that a great deal of that work was done by our crews,” said Whalen.

“Fisher Brothers is proud to be in the building industry. These are the guys who take care of our assets.”

Chief Joe Longa recalls his emergency response to Florida in wake of Hurricane Irma.

‘It was a category five hurricane. The chillers were down, the UPS room was destroyed by the water, the alarms were ringing and there was water everywhere.’

Jack Whalen III, General Manager for Fisher Brothers

There are no better operators and technicians in the industry.”
When Joe McCausland was named building manager of Heron Tower, a 30 year-old boutique office building at 70 East 55 Street his challenge was to upgrade an aging mechanical system. Never one to turn down a challenge the one-time Local 94 Training Center instructor, along with his Chief Engineer Tai Jance, faced the task head-on.

Opened in 1987, the Heron Tower is a 27-story, 154,000 square-foot commercial building providing full floor tenant controlled HVAC, direct electric, and numerous other amenities.

The first step was a full basement to rooftop floor-by-floor assessment. “We looked at everything,” said McCausland. While he knew there was a lot of work to done, McCausland met with the managers at Cushman & Wakefield, and the Takenaka owners and outlined a plan and set a target: LEED Silver.

Today, only two years into their efforts McCausland and Jance have long passed their LEED Silver goal and earned LEED Gold honors.

According to McCausland it started with the replacement and upgrading of the interior and perimeter A/C units. “It was a building that opened in 1987, so even with regular upgrades and maintenance we still had 15 years of catch-up,” McCausland explained.

Beyond the new units, a BMS system was installed. “That was a real game-changer,” said McCausland. “We were finally able to obtain and track what was happening. Before we installed that BMS we were going up. We could clearly see the progression,” McCausland exclaimed.

Based on the rapid turnaround McCausland wanted now wanted to move the target. He called for a meeting with C&W and the Takenaka ownership to explain what he and Jance were seeing. “Once they were aware of what was happening, the decision was made to go for LEED Gold.”

“Not only did they embrace the idea, they engaged all of the tenants in the building,” said McCausland. “They let everyone know what we were doing.” So while Jance was installing low flow fixtures and faucets, and overseeing the new lighting fixtures and VFD’s on the condenser water pumps and cooling towers, tenants were watching their energy costs drop.

As the energy bills fell, the Energy Star rating continued the rise. “It was something to see. Watching that Energy Star going from somewhere in the 60’s to 79 and beyond,” said McCausland.

For some workers dealing with a single supervisor is too much to bear. So how does Local 94 Fireman Yanni (John) Galatalas feel about answering to a trio of school principals and dealing with nearly 1,800 students every day? “I love it. I love every minute of my day. I just have the same,” said Galatalas who has been doing just that for the past five years at K-422 in Spring Creek, Brooklyn.

Opened in 2012, K-422 is home to the three distinct schools. The K through 12 Spring Creek Community School; the Academy for Writers High School; and a D-75 special education program. Each distinct school has its own floor and space. Whether he is walking down a hallway, or on the main floor Galatalas knows, greet and is greeted with a hello and a warm smile. Be it a student, parent, teacher, aide or principal, everyone knows “Yanni.”

Born and raised in Greece, Galatalas arrived at K-422 as the Temco Building Manager when the building first opened. “When they had the switch over the principal asked me to stay. I wasn’t sure what I was going to do,” he recalled.

“Then I met with the people from the union. I learned about the benefits, the pension, the annuity, but it was more than that. The people I met in the union, they made me feel like family,” he said. “It has only been a little more than a year, but I know I represent the union here. I am not going to let them down.”

By any measure Local 94 could have done more than a year, but I know I represent the union here. I am not going to let them down.”

Local 94’s Scholarship Honorees

Antonio Bonomo
Isabella Feeney
Samantha Nathan
Mark DiSpigna
Morgana Haub
Melissa Sambroko

Isabella is attending Worcester Polytechnic Institute as a Unix Scholar studying engineering.

Samantha Nathan
Samantha is the daughter of Stephen Nathan, a Chief Operating Engineer for Silverstein Properties. She has been a member of Local 94 since March 1990.

While attending Kings Park High School in Kings Park, N.Y. Samantha was involved in National Honor Society, National Art Honor Society, Italian Honor Society, Newspaper and Yearbook. She received a Presidential Scholarship from the University of Delaware as well as a Principal’s award from her high school. She was president of her church youth group, GYFA, (Greek Orthodox Youth of America) where she volunteered many hours towards community service, such as feeding the homeless, organizing collections for those in need.

Isabella is attending the University of Delaware where she is studying Chemistry.

Nicholas Zaramotis
Nicholas is the son of Nick Zaramotis, an Engineer for Vornado. He has been a member of Local 94 since October 2008.

While attending H. Frank Carey High School in Franklin Square, N.Y. Nicholas was the president of his Model United Nations, Future Business Leaders of America and Mock Trial club. He has received awards for his debating and oratory skills at various local and national tournaments and competitions.

Bartholomeo Considine
Bartholomeo is the son of Joseph Considine, a Property Manager and Chief Engineer for Jones Lang LaSalle. He has been a member of Local 94 since May 1990.

While attending Corton Harmon High School in Corton-on-Hudson, N.Y., he was Co-President of the Teen Leadership Council and designated a National Merit Scholar and AP Scholar with distinction.

He participated in Destination Imagination – a team-based program designed for elementary through university-level students centered on creativity, problem-solving and STEM (Science, Technology, Engineering, Marketing) principles.

He was recognized for work in the school’s French Exchange programs and more than 1,000 hours of dedication to community service. Bart is an Eagle Scout, an Altar Server for his local church, and active in the youth group. Bartholomeo is attending Boston University and plans to study Mathematics, Computer Science, French and Spanish.

Mark DiSpigna
Mark is the son of Markvito DiSpigna, an Engineer for Cushman & Wakefield. He has been a member of Local 94 since August 1989.

While attending Easton Area High School in Easton, Pennsylvania, Dominique was the Student Council President and a member of the National Honor Society, Latin Honor Society and the Yearbook Staff. She was captain of both of her high school hockey team and her local club team, while also maintaining her position as Easton’s female Student-Athlete representative to the Lehigh Valley’s High School Athletic Council. Dominique was a volunteer coach and NJ/PA certified field hockey referee for grades 2-6. She also volunteered at two different health networks.

Dominique Catalano
Dominique is the daughter of Domenick Catalano, a Mechanic at Stuyvesant Town/Peter Cooper Village. She has been a member of Local 94 since July 2007.

While attending Easton Area High School in Easton, Pennsylvania, Dominique was the Student Council President and a member of the National Honor Society, Latin Honor Society and the Yearbook Staff. She was captain of both of her high school hockey team and her local club team, while also maintaining her position as Easton’s female Student-Athlete representative to the Lehigh Valley’s High School Athletic Council. Dominique was a volunteer coach and NJ/PA certified field hockey referee for grades 2-6. She also volunteered at two different health networks.

Dominique is attending West Chester University’s pre-med program with a pharmaceutical product development major.

Joni Michael Aracena
Joni Michael Aracena is attending Fordham University as a Pre-Med student.

Nicholas is attending Fordham University as an Exercise and Sports Science major. He was an active member of his school’s drama program. He also turned a group of math students during lunch time.

Outside of school, Mark volunteered at Allaire Community Farm where he helped to organize events for special needs children and assisted patients at an HIV/AIDS center in Asbury Park.

Mark is attending Stevens Institute of Technology and plans to major in Quantitative Finance.

Mark is attending Stevens Institute of Technology and plans to major in Quantitative Finance.

Morgana Haub
Morgana Haub is the daughter of Gerhard Haub, an Assistant Chief Engineer for Cushman & Wakefield at 390 Greenwich Street. She has been a member of Local 94 since May 1991.

While attending Communications High School in Wall, N.J. Mark served as both the President of the Student Government Association and the Vice President of the Cultural Communications Club. In his junior year, he was inducted into the National Honor Society and was an active member of his school’s drama program. He also turned a group of math students during lunch time.

Outside of school, Mark volunteered at Allaire Community Farm where he helped to organize events for special needs children and assisted patients at an HIV/AIDS center in Asbury Park.

Local 94 Team at Brooklyn 1 Hotel is as Diverse as Brooklyn Itself

As a magnet for bringing diverse collections of people together, hotels have been the inspiration for storytellers going back to the Canterbury Tales. Fast forward 600 years to Brooklyn, where a new story is being written in the engine room of the Brooklyn 1 Hotel is now unfolding.

In this story the tale is not being told in the lobby, restaurant or lounge. This story is being written in the engine rooms. It is here where a Hispanic woman, Yanela Arroyo, is the Director of Engineering overseeing a diverse engineering crew from the four corners of the globe and backstories to match.

Watch Engineer Nyima Choenyi was born in Tibet. Hector Berinda is from Albania. Arnel Malachi trained his trade in the US Army. Lead Engineer Jefferson Paulino was an auto mechanic, while John Cesepuglio worked at deli-counter before enrolling in engineering classes.

Today they, along with Franco Palma and Atiq Newaz have all been united and organized under the Hotel Trades Council labor agreement as members of IUOE Local 94-B. Even as this diverse group is still learning to familiarize themselves with the 195-room hotel, they are also learning about what it means to hold a union card. “When it comes to the union we’re like babies,” said Paulino. “We need to be fed. We need to learn what it means.”

They are sure to learn what it means by attending union meetings. Engineering-wise, they are responsible for operating and maintaining a waterfront hotel which opened its doors with LEED Certification. “Technically we could be一览 certified but we have submitted for the plaque for gold,” said Arroyo. “With mechanical heat recovery units, VFDs and multi-stacked chillers, a cooling tower, energy efficient lighting, the use of organic materials to harvesting and recycling rainswater for Brooklyn Bridge Park, and an energized “hands-on” crew all make LEED Gold a reachable target.

As for the hotel, its location in the heart of Brooklyn Bridge Park, there are spectacular views of the skyline and East River Bridges and the Statue of Liberty. With each room boasting floor-to-ceiling windows no one is cheated on panorama. There is also no shortage of eateries throughout the hotel. Dining options range from the full service Osprey Restaurant to the Neighbors Café which offers picnic-style fare. There is also a cocktail lounges in the lobby, on the 10th floor and in summer and outdoor rooftop lounge complete with swimming pool is open.

And, as Malachi explained the military education he received at Fort Sill, Oklahoma, carries well beyond the engine room. “Working in a hospitality environment, that military experience plays to good effect when dealing with the different personalities in a hotel.”

$100-Million Texas Center Validates IUOE Nationwide Commitment to Training & Education

After years of planning and two years of construction the International Union of Operating Engineers is about to open the doors to its $100-million state-of-the-art Training and Education Center outside of Houston, Texas. As International President James T. Callahan explained in an interview with the Association of Equipment Managers, “It is to everyone’s benefit to expand the pool of highly-trained, technologically-savvy equipment operators. We have heard the appeals of employers all around the country who are having a hard time getting enough qualified workers on their job sites, and the only way to meet that demand is by creating new, cutting edge opportunities to receive training.”

With that focus on the future the IUOE reached out to local Training Coordinators, including Howard Styles, to help plan and develop a facility which would meet the needs of our members and rapidly evolving technology. “We have heard the appeals of employers all around the country...” International President James T. Callahan

The result is a sprawling 235-acre facility with some 200,000 square-feet of classroom, administrative buildings, mechanical shop, warehouse, and a 227-room dormitory. At the heart of the campus is the 179,200-sf two-story administration/dormitory building with two attached three-story dormitory wings. The Administration Building will house administrative offices, a ballroom that can be divided into eight large classrooms, dining facilities, a commercial kitchen, and a three-story dormitory wing.

The overall site is comprised of exterior teaching areas, secured equipment fenced areas, gravel and paved roads, retention ponds, landscape, hairstyle, parking lots, and pool/deck areas.

Built with a goal of LEED Gold, the center includes a 12,380-sf central plant building. The building facilities will have been built in redundancy for key aspects of the physical plant to allow Stationary Engineers to have hands-on training in real world conditions such as large chillers.

According to IUOE Chief-of-Staff Joseph Giacinto the first classes are scheduled to start early next month. The official grand opening will happen sometime in June.

Once in full operation the training and conference center will host train-the-trainer classes, journeyman upgrade training, and apprentice training. In addition, the facilities will be used for organizer training, new Business Manager/ Business Agent training, and educational meetings for contractors, government officials, and local union and International representatives.

Located in Crosby, Texas, the facility is in close proximity to major airports in the Houston area. The Texas Gulf Coast region is at the center of the oil and gas industry and its offshoots such as pipelines and the petrochemical industry.
Local 94's Toy Drive

Nothing can really tell the story any better than the faces of the children when they first see Santa Claus sitting on the stage surrounded by a mountain of brightly wrapped toys. It is a moment of pure magic.

For the children of Hell's Kitchen a great deal of that magic comes from the generous hearts of the members of Local 94. “Local 94, they are our angels. That was one of the first things I was told when I came to Hartley House a decade ago,” explained Nicole Cicogna.

“All I knew was that I had to go to membership meeting where they were collecting toys. I walked into the room saw all those toys stacked on the stage. I was overwhelmed,” Cicogna recalled. “I thought, there’s no way all of these were for us!”

Well, Cicogna was right about that. The toys collected by Local 94 are distributed to both Hartley House and St. Malachy’s Church on West 48th Street. Then again, it’s not as if any of those children in Hell’s Kitchen are shortchanged.

According to Cicogna some 75-85 children all between the ages of 5 and 12 years ago, who participate in the Hartley House after-school program are presented with gifts from Santa. “Because of the overwhelming generosity of Local 94, each child receives at least two or three gifts. And, because some of these children have siblings who come to the Christmas party, we also have at least one gift for them. These guys at Local 94 are amazing. They even bring us Santa Claus,” she said.

“It was five years ago for various reasons we didn’t have a Santa to hand out the toys. When I told Jack Redden he told me not to worry. Every Christmas since that phone call, Joe Hartnett, an engineer at Rockefeller Center, has put on his red suit, welcomed them with a grand smile and filled their open arms with gifts, and Hartley House with joy!”
If you die before or during commencement of your Annuity benefits, your Individual Annuity Fund Account will be paid to your designated beneficiary. In the absence of a beneficiary designation or if no designated beneficiary is living at the time a benefit becomes payable, your beneficiary will be your surviving lawful Spouse, or if you have no Spouse, your Estate. That is why it is important to take a few moments now to ensure that the beneficiary listed on your account is in accordance with your wishes for these important benefits.

Perhaps you had a recent life change that would require you changing your beneficiary. Even if there have been no changes and you think your beneficiary information is correct, we strongly encourage you to take a moment to review your account to ensure that the beneficiary information on file is current and accurate.

You can check your beneficiary information by calling 800.294.3575 or by visiting the website at mylife.jhrps.com and accessing your account online. Once you have logged in, select ‘Menu’ at the top right and a list of options will appear. Under the category ‘About Me’ select ‘My Profile, Beneficiaries & Settings’. Once on the Profile, Beneficiaries & Settings page, select the ‘Beneficiaries’ tab to view or modify the current beneficiary on your account. Once you have completed the beneficiary designation online, if needed, a confirmation form will be mailed to you to sign and have notarized. You must complete the confirmation and return it to John Hancock in order for it to become effective.

If a participant is married, his or her spouse is their beneficiary for the Annuity Fund. All members are urged to also name a Contingent Beneficiary for the Annuity Fund in the event your spouse passes away before you or with you. Married participants may name a person other than their spouse as a beneficiary for all or part of your Annuity Fund account, provided the spouse agrees to waive his or her rights to this benefit.

When you marry, provide a copy of your marriage certificate to the Annuity Fund Office. In the event you divorce you must provide the Fund Office with a copy of the death certificate. In each of these circumstances, you should be sure your beneficiary designation is current and accurate.

Single Participants
You are urged to name a Primary Beneficiary and a Contingent Beneficiary so the proceeds of your account are distributed to the person(s) you choose. Participants should be aware that when no beneficiary is named the account will be payable to your Estate.

If you need assistance with confirming or modifying your beneficiary information, you may speak to a representative of John Hancock by calling 800.294.3575 from 8am to 10pm EST. The Fund office cannot change your Annuity Fund beneficiary, but if you have any questions, you may call the Annuity Fund at 212. 245.7040.

Ensure that the beneficiary listed on your account is in accordance with your wishes for these important benefits.

Be Sure to Maintain the Beneficiary Information on your Annuity Account

We’re Going Mobile! Are You Ready?

I.U.O.E. Local 94, 94A, 94B and the Affiliated Funds have launched two important new services—an online I.U.O.E. Local 94 Member Portal and text messaging. Both new services are in response to requests from you, our members and participants. Keep an eye on our website (www.local94.com) for the latest updates.

Online Member Portal
The I.U.O.E. Local 94 Member Portal allows members and participants the ability to view basic demographic information, as well as access Sick Fund information, including being able to review current balances, past contributions and recent disbursements. Over time, the I.U.O.E. Local 94 Member Portal will be expanded to provide you with access to various other information and benefits materials.

In order to access the I.U.O.E. Local 94 Member Portal, you must have a personal e-mail account on file with the Union and Funds. Your personal e-mail account will serve as your login and will be the e-mail address that is used to communicate with you regarding the I.U.O.E. Local 94 Member Portal. Please update your Contact Information Form to make sure we have the correct email address for you. You can find the Contact Information Form on the Forms page of our website in the Local 94 Forms section.

Text Messaging
The I.U.O.E. Local 94, 94A, 94B and the Affiliated Funds started a text messaging program to provide the latest news and updates to members and participants.

In order to take advantage of these two new services, you need to make sure we always have your current email address and mobile phone number. If either changes, make sure to update your Contact Information Form and send it in to us as soon as possible.

The I.U.O.E. Local 94, 94A, 94B and the Affiliated Funds started a text messaging program to provide the latest news and updates to members and participants.

Keep Your Information Up to Date
In order to take advantage of these two new services, you need to make sure we always have your current email address and mobile phone number. If either changes, make sure to update your Contact Information Form and send it in to us as soon as possible.

News on Dues

How Dues Is Calculated
Your monthly dues are calculated by multiplying your hourly wage by 2.50. When your hourly wage increases, your monthly dues increase as well. Maximum monthly Dues are $90.18 in 2018, any member earning $36.07 or more, per hour owes the maximum.

Important
Members who have completed a Dues Check-Off should always check paystubs to ensure that your employer is withholding your dues and doing so at the proper rate. If you are unsure if the amount is correct, call the Union Office and the staff will be happy to assist you. Remember, if your employer is not calculating your dues properly, there is a chance they are also not reporting the correct amount to the Sick Fund.

Please Remember
Even if you are on Dues Check-Off, dues are your responsibility. If your employer fails to withhold your dues or does not withhold the proper amount, you are still responsible for the unpaid dues. And a delinquency notice will be mailed to you. If you believe it is in error and/or you have copies of paystubs which verify the employer witheld your dues, please contact the Union Office and the staff will review it with you. Failure to respond to a delinquency notice for dues will result in a notice to appear before the Executive Board.

Failure to rectify the matter and/or appear before the Executive Board will result in your Suspension from the Union, and in accordance with the by-laws of the Union, removal from the job.

Do We Have Your Correct Address
You are required to have your current address on file with the Union Office. If you move, or have a change of phone number and/or email address, you must supply it to the Union Office in writing. No changes will be accepted over the phone. You may obtain the form on the website at www.local94.com or by stopping in or calling the Union Office at 212-351-1800. If you have an email address, please be sure to supply it. Any change in contact information requires the fully completed form which includes an effective date and member’s signature.

A Word About Payroll Audits
The Benefit Funds are required to ensure that employer’s reports all benefits they are required to pay on behalf of employees covered under the collective bargaining agreement. To comply with this, routine payroll audits are conducted on behalf of the Benefit Funds. The Fund records of hours reported are compared with the employer’s payroll records to determine if there is any discrepancy due to error or omission. These audits often find hours unreported due to an error, or lack of understanding of the terms of the collective bargaining agreement. This is a routine process which the majority of employer’s readily comply with. Should an employer refuse an audit or fail to provide the required records to perform a payroll audit, an arbitration hearing is scheduled to resolve the matter.

Members are encouraged to always check their paystubs and ensure that they have been paid for all of the hours due. This includes Hours Worked, Floating Holidays and Holidays (refer to your contract for covered Holidays).

Union Dues Still Deductable On Your 2017 Federal Return
New York State will Allow the Dues Deduction on 2018 State Returns.

New tax code change in New York State allows union members to deduct dues on next year’s taxes.

While much has been made of the Trump/GOP Tax Cut, the president and the legislators who created it have made no bones about the harm it does to union members. The new tax may have doubled the standard deduction to $24,000 per couple; but it eliminated the deductions for among other things, mortgage interest and union dues.

However, you can still take the union dues deduction on your 2017 federal return. Although union members will be losing the dues deduction on their federal next year, members who live in New York State, will be able to take the deduction on their 2018 state return.

State Senator Diane Savino, Vice Chair of both the Senate Standing Committee of Finance and Codes is again reminding constituents if they are in a union in New York, they will be able to deduct their dues and shop fees on their taxes next April.

“It is important to be mindful of this year’s tax changes as we are all headed to our accountants before the April deadline” said Senator Diane Savino (Staten Island/Brooklyn). “If you are a middle class New Yorker in a union, this is another way you can save. This is something myself and the Independent Democratic Conference (IDC) worked tirelessly on, and we are excited to see the results.”

This tax break is estimated to help over 500,000 New York Union Workers save approximately $35 million each year. As union rights have become increasingly under attack, Senator Savino and the IDC have lead the way in historic legislation to protect working class rights.

FIRE LIFE SAFETY DIRECTOR COURSE
The Training Center has introduced new procedures and classes toward the FDNY’s FLS Director Certification. Fire Safety/Active Shooter Medical Emergency Preparedness (FS/ASMEP) Classes are already underway. There is still time to register for the Emergency Action Plan Director Course (EAP) which will begin May.

All courses will of course be offered again in September along with the new 31 hour Fire Life Safety Director Course.
