

# 44th Annual Scholarship Journal

2024

I. U. O. E. Local 94, 94A, 94B

**Getting to where it is today was no easy task for the IUOE. The road was strewn with obstacles and resistance. It was only through dedicated leadership, sacrifice, sweat and perseverance that the union was able to advance.**

Working conditions for construction and stationary workers in the late 1800 were, at best, appalling. Their wages, for 60-to-90-hour work weeks, were equally miserable. Benefits were practically unheard of.

In an effort to change those conditions, a small group of stationary engineers met in Chicago Dec. 7, 1896 to form the National Union of Steam Engineers of America, the forerunner of today's IUOE.

Each was from a small U.S. local union. The largest had only 40 members and all but one local was from the stationary field. The majority of these founders shared a common skill: the ability to operate the dangerous steam boilers of the day. (In fitting tribute to these early pioneers, a steam gauge even today dominates the emblem, or logo, of the IUOE.)

A year later, the first Canadian workers joined the fledgling union. To reflect this expansion across the border, the union's name was changed to the International Union of Steam Engineers.

Their unique ability made the steam engineers vital to the operation of steam-driven construction equipment introduced on a large scale at the turn of the century.

More and more construction workers signed on after the turn of the century and the union changed its name at its 1912 Convention to reflect this new composition, becoming the International Union of Steam and Operating Engineers.

Operating Engineers flocked to San Francisco to rebuild that majestic city after it was turned to rubble in the earthquake of 1906. Additional thousands of Operating Engineers moved mountains in the next few years in digging the Panama Canal.

As members began working with internal combustion engines, electric motors, hydraulic machinery and refrigerating systems, as well as steam boilers and engines, the word "steam" was dropped from the union's name and in 1928 it became the International Union of Operating Engineers.

As the organization continued its growth, it attracted workers from the public sector, making it a truly diverse trade union.

Passage of the Davis-Bacon Act of 1931, which guaranteed construction workers' wage rates on federally financed projects, helped the union members weather the after-effects of the Great Depression and maintain their wages.

The IUOE later would become an essential part of the Seabees, skilled construction men who lent their talents to the U.S. Navy. They carved out bases, airfields and roads in war zones from the beaches of Europe to the DMZ of Korea to the jungles of Vietnam.

The IUOE's growth and progress was fueled greatly at the end of World War II when the Federal Highway Trust Program came into existence, creating thousands of jobs for Operating Engineers.

In the intervening years, the union persevered through boom times and lean times. Today its members are reaping the rewards of the sacrifices and foresight of their predecessors.

And rightfully so, because the Operating Engineers, as much as anyone, helped build America and Canada. San Francisco's Golden Gate Bridge, the Panama Canal, Chicago's Sears Tower, Toronto's CN Tower and Sky Dome, New York's Empire State Building and Holland Tunnel, the Statue of Liberty, Vancouver's Lions Gate Bridge, the Alaskan Pipeline and Hoover Dam--all are monuments to the skills of the members of the Operating Engineers.

Whether it's the roads you travel on, the bridges you cross, the tunnels you whisk through, the subway systems you ride...or the buildings and complexes where you work, receive medical care, view sporting events...or the dams, pipelines, oil refineries and rigs, and petro-chemical plants you rely on for water and energy needs...or programs to rid your schools and communities of asbestos and hazardous materials and waste....it's a good bet they were built and are operated and serviced by members of the IUOE.

# Greetings

July 20, 2024

Dear Members and Friends:

This year we are celebrating our Forty-Second Annual IUOE Local 94, 94A, 94B Scholarship Fund Family Picnic. The Local 94 Annual Picnic is one of our favorite events of the year and this year we are happy to be back again at Krucker's Catering & Picnic in Pomona, NY. It is an event enjoyed by all members, guests, and their families but also one that raises money to help support our Local 94 Scholarship Fund.

Since our first picnic in 1980 we have come a long way. That first year we had approximately 300 people in attendance, now we have over 2,500. As I have said many times before, our success can only be attributed to having a wonderful team working together to achieve one goal, to keep our Scholarship Fund vital. We want to commend all our members for their constant support and loyalty to the Scholarship Fund. We would also like to extend appreciation to our sister Unions, the Employers, and various Business Firms for their contribution to our Journal each year.

The Scholarship Fund has provided a total of 279 scholarships to Local 94 children. As of 2019 we were able to increase the number of recipients from 10 to 12 and the total award the recipients to receive to \$10,000 each. We are happy to announce that once again this year, Jack Resnick and Sons funded a 13th Scholarship for 4 years in honor of deceased member Michael Wong. Additionally the Gristina family has also funded a 14th Scholarship in honor of deceased member Stefano Gristina. As we have mentioned before, our success is not the result of a single individual; it is made possible through your support of the Family Picnic, the Journal, the Golf outings, and the Dinner Dance that we are able to continue to encourage our children to pursue their educational goals.

Thank you again for being part of the team and we hope that you will continue to do so in the future.

Fraternally,

*We Will Never Forget*

## *In Memory of*

*Vito Deleo*

*Charles Magee*

*John Griffin Jr.*

*David Williams*

What used to be the World Trade Center is now called "Ground Zero". It should however be renamed "Ground Hero". There are stories of heroism that have been told and stories of heroism that will never be told. Let us tell you about our four I.U.O.E. Local 94 Heroes. John Griffin, Jr. and Charles Magee immediately responded to the emergency despite the inherent danger and assisted with the evacuation of tenants. Vito Deleo and David Williams helped tenants find their way safely out of the building and were themselves two blocks away from the Twin Towers when they made the unselfish decision to return to continue to help with the evacuation. All four are still missing but will not be forgotten. We should pray for these heroes and also pray for the silent heroes, those who have been left to go through life without their loved ones.

## *General President*

The advertisement for Able Services features a wide-angle photograph of a city skyline, likely New York City, with the Freedom Tower prominently in the center. The sky is a mix of blue and orange, suggesting a sunset or sunrise. The water in the foreground is calm. In the top left corner, the "Able Services" logo is displayed, with "Able" in white text on a red square and "Services" in a smaller, grey font. To the right of the logo, the text "SOLUTIONS FOR FACILITY OPERATIONS." is written in a clean, sans-serif font. Below this, the word "Since" is written in a red, cursive script, followed by the year "1926" in a grey, sans-serif font. At the bottom of the image, the tagline "Working together to deliver valuAble work-life experiences" is written in a white, sans-serif font, with the word "valuAble" in all caps.
